SUMMARY

Full-cycle Product Manager with a CS background and a track record of launching 0→1 features in vertical SaaS and fintech. Combines customer discovery, AI-assisted technical scoping, and rapid prototyping with hands-on go-to-market execution across in-app announcements, video production, and cross-functional enablement of sales, onboarding, and support teams.

EDUCATION

Vanderbilt University, School of Engineering

B.S. Computer Science, Minor in Business | GPA: 3.57/4.00

Nashville, TN

Aug 2020 – May 2023

PROFESSIONAL EXPERIENCE

Mangomint Inc.

Product Manager

Remote

Nov 2023 – Present

- Own end-to-end product strategy, roadmap prioritization, and agile delivery across three verticals: Core Platform (system of record + customer engagement), FinTech (payments, payroll, embedded financial services), and Growth (retention & revenue optimization).
- Launched and maintained Payroll Processing add-on (0→1), **achieving 23% customer adoption**; led Salesforce x Payroll onboarding sync **saving 12+ hrs/week** for the payroll team and accelerating time-to-value.
- Launched Group Booking (0→1) featuring complex multi-guest availability and concurrent scheduling logic, **driving 41K+ group appointments booked** since launch.
- Built and scaled Flows (0→1) an event-triggered, condition-based automated messaging engine (SMS, email, credits, delays); achieving **58% adoption**, **55M marketing credits consumed in 18 months**, and \$540K+ in incremental revenue. Shipped 15+ iterative enhancements covering trigger logic, conditional filtering, goal tracking, and frequency capping.
- Launched Rule-Based Offers (0→1) enabling automated discounting tied to service, product, and customer criteria; drove **66% adoption** (24K+ offers created, 23K+ activated across ~3,800 companies) with integrated revenue reporting.

TikTok

Product Marketing Manager Intern | Product Strategy, Monetization & Operations

New York, NY

Jun 2022 – Sep 2022

- Identified untapped opportunities in the gaming vertical to shape future In-App Gaming Ads strategy; developed a North America go-to-market plan for new ad products.
- Analyzed ad product performance across IAA/IAP, CPA/CPI, and targeting metrics to surface actionable recommendations on measurement strategy, product improvements, and data visualization.
- Built the 'North American Gaming Vertical Data Insights' tool** with dynamic filters for market segmentation and revenue drilldowns.
- Developed the 'Gaming Advertiser Gainers & Droppers Dynamic Tracker' to identify advertisers scaling spend and flag churn risk, and a 'VIP Client Insight Request Tool' to automate recurring advertiser reporting.

PROJECTS & CAMPUS INVOLVEMENT

[Elevated Living Design — Personal Web Project](#)

Sep 2024

- Full-stack website for a hypothetical interior design concierge, built with HTML, CSS, and JavaScript; showcases mission, projects, client reviews, and contact flow.

[Rate My Vandy Course — Web App](#) | Full-Stack Engineer

Jan – May 2023

- Designed and deployed a course-review platform (similar to RateMyProfessor, focused on course material) with a team of 4 engineers; awarded 2nd place among 50+ projects at Vanderbilt Design Day CS showcase.

Data Visualization & ML Research | Undergraduate Research Assistant

Jan – May 2023

- Researched how visualized Bayesian Neural Network explanations improve human reasoning about model behavior; applied Bayesianization via PyTorch on ResNet-50 (ImageNet) and designed explanation visualizations to evaluate decision-making transparency.

[Super Money Kids — Mobile App](#) | PM & Software Developer, Vanderbilt Change++

Aug 2021 – May 2022

- Led cross-functional team (engineering + design) to ship a financial literacy app used by 10,000+ users; facilitated bi-weekly sprint reviews/retros and contributed to frontend (React Native) and backend (Firebase, Node.js, MongoDB) development.

Vanderbilt Finance Development Program

Oct 2020 – May 2021

- Selected as 1 of 33 high-potential sophomores for a competitive financial training cohort covering modeling, accounting, valuation, and market analysis.

Center for Nonlinear Dynamics & Control — Mechatronics Systems Lab, Villanova University

Dec 2019 – Apr 2020

Assistant in Research to Dr. Garrett M. Clayton (Fulbright Scholar)

- Assisted in building an IED-disabling robot at 10% of commercial cost with 90% functionality; applied electrical/mechanical skills including soldering and SolidWorks 3D-printed component design.

SKILLS & INTERESTS

Tools & Languages: Linear, Jira, Figma, Productboard | Snowflake, Sigma, Datadog | SQL, Python, JavaScript, React, Node.js

Core Competencies: Vertical SaaS product strategy, 0→1 feature development, monetization & retention optimization, growth & lifecycle automation, embedded financial services, cross-functional team leadership, data-driven roadmap prioritization, API-driven integrations

Additional: Delta Sigma Pi Professional Business Fraternity • Change++ • Kappa Kappa Gamma

Interests: Ski trips, running, a competitive relationship with my spice tolerance, and unapologetically ambitious recipes
